

WESTERN AFFAIRS OCCUPIED THE DAY IN PARLIAMENT

Lake, Sifton and Foster Take Part in Debate on Borden's Amendment--V. W. & Y. Bill Passes Senate

Ottawa, May 31.—The House today discussed Mr. Borden's amendment regarding lands. Mr. Lake of Quebec was the first speaker. He protested against officials taking part in election. Mr. Sifton spoke three hours and a half covering the whole administration of the Interior Department and declared that he had no desire to change one action of his while in office. He said that Mr. Foster was brave when he (Sifton) was in Florida but since he came back, Mr. Foster sneaked into the House and now refused either to establish or retract his insinuations. Mr. Foster followed, covering the ground he previously went over. Mr. Turfitt moved the adjournment of the debate. Mr. Fitzpatrick was in the House today. It is said that he may be in the supreme court as Chief Justice on Monday next. In that case Mr. Aylsworth will become Minister of Justice and Attorney-General. Lemieux will be made postmaster general.

There was a field day in the Senate on the Vancouver, Westminster and Yukon Railway which is a branch of the main line through the Yellow Head Pass to Edmonton. Senator Gilmour supported the bill. He said it was being opposed by Mackenzie and Mann. Senator Davis opposed the bill. He said that who has charge of the bill said it was in the interests of British Columbia and Senator McDonald of B.C. said the bill had nothing to do with the road. Senator Foster said Hill was behind it. Senator Frost said Ontario would welcome Hill to build a railroad without subsidies. Senator Dewar for Alberta said the line was wanted and Senator Watson said that Hendry a wealthy lumberman from B.C. was behind the undertaking. Wat-

son said that Davis put through the bill on which Hill is now building to Medicine Hat and Brandon. Senator Jaffray made his maiden speech in support of the bill. The Government amendment as to running rights through the Yellow Head Pass was accepted and the bill read a third time and passed on a vote of 28-16.

CRICKET.

The following team has been chosen to play against Strathcona on Saturday: H. R. Mountfield, O. Boyce, Rev. H. H. Wilkinson, A. H. Jones, G. H. Adams, A. E. Hopkins, J. E. Field, C. D. Pass, Serger, Jackson, J. Graham, and J. R. Hartley. The game will commence at 2.30 sharp.

E. D. GRIERSON BUILDS HANDSOME

RESIDENCE

Mr. E. D. Grierson, who recently returned from California, took out a building permit at the city offices yesterday for a handsome residence to be built on the west side of Seventh street, between Hardisty and Mackay. The new house will be a two-story brick with high basement and wide balconies all around. The estimated cost of the house is \$7000.

BUSINESS MEN WILL MEET HERE

Annual Convention of the Associated Boards of Trade

Edmonton is to be honored in two weeks with a visit of a large number of the most prominent business men in the two provinces of Alberta and Saskatchewan. The occasion of their visit is the third annual convention of delegates of the associated boards of trade of Western Canada, which will open in the Oddfellows hall, Norwood Block, 1653 Jasper Avenue, at 10 o'clock on the morning of Wednesday, June 13th, and will continue on the evening of Thursday, the 14th.

The convention will be one of the most important gatherings that has ever been held in Edmonton. The arrangements are under the direction of the Edmonton board of trade, and the following committees have been laboring with unceasing energy to provide for the reception and entertainment of the delegates, and completing arrangements for the convention.

Reception committee—Mayor May, the city aldermen, and Messrs. A. T. Cushing, G. F. Kirkpatrick, and J. H. Morris.

Entertainment committee—Messrs. T. W. Lines, T. M. Turnbull, O. M. Biggar, C. W. Strathy, and R. Mays.

Financial Committee—Messrs. Cushing, K. W. McKenzie, A. W. Campbell, R. J. Manson, R. Secord.

Press Committee—Duncan Marshall, J. W. Cunningham, A. B. Watt, and Howard Stubbart.

Arrangements will be made for the accommodation of the delegates at the various hotels.

A detailed program of the sessions and proceedings of the convention will be published later. There will be probably morning, afternoon and evening sessions, the first day and morning and afternoon sessions the second day.

As far as can be learned, there will be seventy-five delegates in attendance, representing all the principal towns and cities in the two provinces. The chairman of the convention will be R. J. Hutchings, of Calgary, and vice president of the associated boards. Mr. Thomas Tweed was last year elected president, but he is now deceased. The second vice-president is ex-Judge Maguire of Prince Albert, and the secretary is Wm. Trant, of Regina.

The convention last year was held at Regina and there were seventy-four delegates in attendance. President Tweed presided. The committee on credentials elected for this year was T. W. Lines, Edmonton, W. T. Fitzpatrick, Medicine Hat, Wm. Trant, Regina.

A great portion of the time of the convention will be taken up in the discussion of the resolutions to be presented by various boards, and which touch upon matters of most vital importance to the commercial interests of the two provinces. The resolutions are to be found in another column of this issue. The committee on resolutions for this convention is as follows:

Ex-Judge Maguire, Prince Albert, chairman; T. H. Babcock, Weyburn; J. A. McCaul, Indian Head; W. B. Willoughby, Moose Jaw; Wm. Short, Edmonton; H. F. Myton, Regina; J. C. Clinniskill, Saskatoon, and R. J. Hutchings, Calgary.

MOCK PARLIAMENT MEETS
The mock parliament in connection with the Young Men's Liberal Club which was formally opened on Tuesday evening in the club rooms, will meet again this evening, when the debate on the speech from the throne will be resumed.

NEW TRIAL FOR THE TRIO

Alleged Train Robbers Will be Tried Again This Week in Kamloops

Kamloops, June 1.—Peter Morrill the foreman aged 60, was the lone jurymen who stood out for the acquittal of the alleged train robbers. Morrill has often been heard to declare that a poor man should never be sent to prison. It is claimed that the remaining eleven were for conviction. MacIntyre, counsel for defence made two ineffectual efforts to secure a change of venue to Revelstoke or Vancouver, but the motion was denied by Mr. Justice Irving. A new jury was empanelled and the evidence will be repeated. The case will probably be finished Saturday evening. The prisoners were delighted with the turn of affairs and are more cheerful than at any time since their arrest.

LAKE STEAMER CUT IN TWO

Five Men Drowned by a Collision in the St. Clair River

Detroit, Mich., June 1.—The steamer Erin inbound and towing the schooner Danforth was run into and cut in two by the steamer Cowie in St. Clair river just below St. Clair early today and five members of the Erin's crew were drowned. The dead are Engineer Patrick W. Quinn, Port Dalhousie; Fireman Bingham, St. Catharines; Mrs. Mary Reed, Spanish River; a watchman shipped from Detroit, home, Amherstburg; a woman cook from Buffalo, Mrs. Hubert. The Erin is owned by Thomas Conlin of Thorold. The collision occurred during a fog. The Cowie is a motor freighter and is not thought to have been much damaged. The Erin was a wooden vessel of the old type.

LIGHT VOTE FOR ALDERMEN

Indications That not More Than Half the Possible Vote Will be Brought Out Today

The election for alderman to-day to fill the place at the council board vacated by John R. Boyle, is not causing any great excitement among the electors of the city and the indications are that the vote will be very light.

The heaviest voting took place at noon hour, as up to that time scarcely a hundred votes had been cast. At 1.15, however, even after the noon-hour vote was all in, only 259 had voted which is scarcely more than one-quarter of the vote. At the last regular mayoralty ticket, and the indications this afternoon are that the vote to-day will not be half the possible.

Mr. Semer's friends appear to be working the hardest, and to have the best organization for getting voters to the polls, but both the other candidates are taking matters coolly, each apparently confident of success.

The polls close at 5 o'clock, and the result should be known within the hour. The council has a special meeting to-night, when the newly-elected alderman, whoever he happens to be, will probably attend.

SPAIN'S ROYAL BRIDAL PAIR NARROWLY ESCAPE ASSASSINATION

Anarchist Throws Bomb at the Royal Carriage as it Enters the Palace on the Return From the Wedding Ceremony--Sixteen Killed and Many Injured

COAL SHAFT DOWN 100 FEET
Rapid progress is being made on the coal shaft which is being put down by Horn & Osborne at Rat Creek. The contractors at present engaged are the second to tackle the proposition of putting a shaft down to the coal and so far they appear to have been successful. The first contractors got down 89 or 93 feet, but the shaft caved in. The present contractors are a team of Scotchmen from Leithbridge, who seem to understand the mining proposition from the grass roots down. They are putting down a double-compartment shaft timbered with 8x8, and have reached a depth of 160 feet. For the past two weeks they have been working in quicksand, but they have now only 18 inches to go in this until they strike clay again and will then make much faster progress. According to the borehole tests they should strike the coal they are looking for at 230 feet. The shaft is situated within 50 feet of the C.N.R. and will therefore have transportation advantages which no other coal property in this vicinity enjoys.

ORGANIZATION PROGRESSING

The organization of "A" squadron of the C.M.R. is progressing rapidly, and each evening Major Paton enrolls a good number of recruits. R. N. Day, Quarter-Master Sergt., is in charge of the stores and equipment, and provides each man with his equipment as he enrolls. The equipment consists of Lee-Enfield rifle, saddle and harness for horse, spurs, cartridge belt, waist-belt and bayonet. Last evening several of the recruits were enlightened in the mysteries of saddling and harnessing their horses. Squad drill on foot is being given each evening to the recruits. The uniforms are expected to arrive this week.

EASR MONEY FOR LOCAL MAN

East money for local man
S. S. Friend, an Edmonton carpenter, has been notified that he has won the capital prize in the Alberta Hotel (Calgary) Derby sweep, having drawn Spearpoint, the winning horse. Friend bought his ticket at the Windsor Hotel here and was only a dollar in on the sweep. It is not known here what the amount of money coming to him will be, but it should be between \$2500 and \$4,000.

VITAL STATISTICS

The registration of births marriages and deaths in the office of St. Geo. Jellett, show that there have been during the month of May 13 deaths, of which 3 were male and 10 female, 9 marriages, and 25 births, of which 12 are male and 13 female.

EXPLORER LEAVES FOR FAR NORTH

Thos. Anderson, chief factor of the Hudson Bay Co. in the MacKenzie River country and V. Steffanson, the young man from Harvard college, who is going to explore the Arctic coast of Canada, left this morning by the Athabasca Landing stage. They will take the down-river route from the Landing and figure to reach Fort MacPherson within a day or two of six weeks. From there Mr. Steffanson will go to Herschel Island, where he will be picked up by the Lady Bedford, which sailed from Victoria, B.C., a few days ago for the north.

Madrid, June 1.—Rejoicing over the marriage of King Alfonso and Princess Ena had a terribly dramatic sequel this afternoon as a bomb thrown from an upper window exploded with deadly effect near the carriage occupied by the King and Queen, who escaped by an electric wire deflecting the bomb, but at least sixteen persons, most of them being of the military escort, were killed and many injured. The scene of the tragedy presented a horrible spectacle with men and horses lying about torn to pieces. The bodies of the men were wrapped up in blankets and removed on litters. The pavement was literally covered with blood. A Police Bugler's head was severed from his body and two women spectators were killed. A soldier standing at salute was fatally injured. The shock of the explosion was terrific. The killed are Capt. Barro, commanding the King's escort, Lieut. Reycoat and Prendergast and six soldiers, Marchioness of Colosa and her daughter, Don Antonio Calvo and his niece, aged six, Jose Solis, aged 7, Louis Fonseca, one of the royal rooms leading a horse in the king's carriage. Several were killed who were standing on the balcony of the house from which the bomb was thrown. The explosion occurred just as the royal couple were entering the palace. The screams of the terrified public were mingled with the awful groans of the wounded. The King immediately alighted and assisted the Queen out of the carriage. They found another coach and drove to another entrance to the palace. This all happened so quickly that people away from the vicinity of the carriage were not aware of the tragedy and continued to acclaim their sovereigns. Soon, however, there appeared the empty carriage with two horses maimed and others splattered with blood. The drivers looked pale. Then came a boy shouting that a bomb had been thrown at the King. Then the applauding populace was awed into silence. Many arrests have been made, among them that of Manuel Duran, a Catalonian, who is believed to have been the principal conspirator. It is said that immediately upon the explosion Duran was seized and hurried down stairs. As he entered the street men flung themselves upon him, shouting "Kill the assassin." Mounted guards pressed around and took him away under a strong escort. A rumor which was circulated rapidly stating that the King had been killed created consternation for some time.

Madrid, June 1st.—Lair King Alfonso went with his bride to the palace chapel, where they offered up lengthy prayers. Premier Moret and Minister of the Interior Remonsinos are personally conducting an investigation of the outrage. The streets are littered with scraps of clothing and ghastly relics of the outrage. The city hall has been used as a temporary hospital, one of the dead officers lying in a hammock in one of the mayor's offices. Squads of guards entered at frequent intervals bringing litters bearing dead or unconscious victims.

London, June 1.—A dispatch from Madrid to-day says that it was an Italian anarchist who threw the bomb at the carriage of the King and Queen of Spain and that after the explosion he committed suicide. Another dispatch to the same paper says that the assassin is named Mateo Moral, and that he has escaped.

BRILLIANT SCENES IN OLD MADRID

Most Magnificent Pageant of Modern
Times Celebrated Royal Wedding

Madrid, Spain, June 1.—On an occasion marked by one of the most brilliant pageants ever witnessed in continental Europe, Princess Ena of Battenburg was wedded to King Alfonso of Spain today in the Church of St. Geromino. The weather was magnificently favorable, the sun shining down from a cloudless sky on the resplendent pageant, which was witnessed by thousands of people, filling every place of vantage from which a view could be obtained. On the way to the church and on the tour back from that edifice to the palace, the royal bridal couple were enthusiastically cheered and the patriotism was one of the features of the brilliant event.

The city awoke under a cloudless sky, with dazzling sunshine adding its glories to the bewildering mass of color in which the streets were enveloped. From early hour the centres presented an aspect of extreme animation. The entire night had been passed amid the din of fireworks, singing and dancing and thousands of provincials unable to secure shelter spent the night in cafes and the streets. At 8 o'clock crowds densely packed the main thoroughfares and the troops took up their positions stopping all traffic and the whole city took on an air of feverish expectancy. The esplanade fronting the Royal palace was occupied by regiments of Royal guards in full uniforms with glittering breastplates and helmets. They formed semicircles guarding the approaches to the palace from the crowds eager to gain points of vantage. The massive outlines of the palace were without decorations, save the royal standard floating above. Detachments of halberdiers with quaint cockades, stood with weapons crossed at the Princess gate leading to palace courtyard. All along the route of the cortege hurried preparations were going on. Troops lined both sides of the streets in solid ranks, for miles. The scene from the Puerto Del Sol to the Pardo palace was one of striking brilliancy. All the buildings were resplendent with the yellow and red colors of Spain woven into sunbursts, huge rosettes and graceful stringers looped from roof to roof and arches of roses from which were suspended enormous flower baskets and trailing vines. Under this dazzling canopy of flags and flowers surged dense masses of humanity in festive attire, the women wearing white mantillas and bunches of bright flowers in their hair and with bright colored fans whipping the air. The population of the city had turned out in a body and was augmented to twice its usual size by visitors from the country and neighboring towns. Princess Ena came from the Pardo palace to Madrid, early in the morning, accompanied by her mother, Princess Henry of Battenburg and her ladies of honor and escorted by a regiment of Royal guards. The bride's party was installed in the ministry of marine which had been sumptuously prepared for her. There the Princess put on her wedding dress and Queen Christina greeted the bride after which the ladies breakfasted together in the blue salon of the ministry. The wedding cortege started from the Royal palace about 9:30 a.m., amid the ringing of church bells, the firing of artillery and the clamorous enthusiasm of the crowds massed along the route. Ahead rode trumpeters in crimson velvet suits of the time of Philip I., sounding the approach of the Royal party. Following them came the personnel of the Royal household the heralds; mounted on stallions, caparisoned in oriental style each led by a coet of the royal riding academy and the equierres and grooms from the royal stables, leading the King's favorite horses with gold embroidered saddle cloths and colored plumes accompanied by pages and riding masters and all the bewildering equipment of a luxurious court. Next came a long line of gala coaches of the Spanish grandees each of a distinctive color with panels richly painted, gilded and jewelled and drawn by magnificent horses in silver harness adorned by tall plumes matching the livery. Within rode the nobility of Spain, the men with their breasts covered with orders and the women in wedding attire. But the brilliancy of the leaders of the cortege was far surpassed when the famous royal gala coaches came into view, each drawn by eight superb white horses with golden and silver harness and lofty colored plumage; looking like the coaches depicted on some illuminated page of a fairy book. The coaches formed one of the most

together. They were marvels of luxury, some of tortoise shells, others of mahogany set with panels painted by famous artists, all ornamented with precious metals and embellished with the royal insignia. They were relics of by-gone days when Kings and Queens rode in golden vehicles but they had been renovated in all their original splendor for this occasion.

Closing this dazzling array appeared a coach bearing the Royal crown in which were seated King Alfonso, his witness Prince Carlos and His Majesty's little nephew Prince Alfonso, the actual heir to the throne of Spain. As the King's coach appeared it was greeted by a great roar, while the multitude wildly waved handkerchiefs, fans and parasols. His Majesty could plainly be seen smiling and bowing to the people. He wore the uniform of a field marshal his hat surmounted by a sweeping white plume. Around his coach was a cavalcade of royal guards, heralds, equierres and pages holding back the enthusiastic populace. Immediately following the royal coach came the bride's party focusing another glittering array of gala coaches, bearing the lords and ladies in waiting and the princesses and princesses of the House of Battenburg and finally came the famed mahogany coach with the radiant Princess Ena attended by her mother and Queen Marie Christiana. The appearance of the princess, who was about to become their queen aroused the people to the highest pitch of emotion, while others from the balconies of the houses along the route showered flowers on the princess and let loose hundreds of pigeons carrying long bright streamers.

FORT SASKATCHEWAN NEWS

Fort Saskatchewan, May 30.—The majority of farmers in this vicinity have finished putting in their crops. The price of hay has had a big drop and good hay can now be bought for a little over three quarters the price paid for it a month or six weeks ago. Deliveries are brisk. The C. M. R. officers and men are turning out to drill in good style. Over thirty were in the ranks for drill last evening and the number is likely to increase in a few days, as the men in the country belonging to the troop have not, with few exceptions, heard that drill is started. Some say yet have been unable to secure horses for the evening drill.

Dr. Turner's house on Government street is now completed. It is a solid brick with a good stone foundation and built by the Bowden Brothers.

Fort Saskatchewan, May 31.—The new fire and town hall is now completely under way. The stonework was completed today, and the brick work started. The contractor thinks he will require about \$5,000 brick to finish the work.

Work on the electric light building will be soon started. The lot has been cleared and is now ready for the mason work. Mr. Higman, manager of the concern, has hired Mr. James Roberts to act as engineer. Mr. Roberts has for some time past been engaged by Shera & Co. as engineer at their flour mill and he will be replaced by Mr. George Ferguson. The tennis court is kept fairly busy these days. There are two double courts and these are occupied most of the time.

GUN CLUB SHOOT

The gun club held its opening shoot at the exhibition grounds yesterday evening and considering the lack of practice, good scores were made.

There will be a shoot on Saturday afternoon at 1 o'clock, when all interested are invited to be on hand.

VETERAN CHINESE STATESMAN RETIRES

The Times correspondent at Peking cables as follows:—Wu Ting Fang has left Peking. He goes into retirement and after visiting the tombs of his ancestors will reside at Shanghai, that haven for wealthy Chinese seeking freedom from official interference. He has devoted some years to an effort to humanize the administration of justice in China. His memorial urging the removal of some of the more barbarous death sentences and torture was approved by Imperial edict last year, but effect had never been given to the edict until recently. Wu Ting Fang drafted the code of procedure in civil and criminal cases, a work which was admitted as a literary effort and suggested, among other things, trial by jury. This innovation is regarded with dismay by litigants, which necessitates having to bribe a jury as well as a magistrate and must add an intolerable burden to the present cost of litigation. He retired discouraged by the outlook in seeing no reasonable prospect of reform to the judicial system as expressed in article XIII, Mc-Kay treaty, 1902 any more than of reform in the monetary system promised in the same treaty.

WESTERN BUSINESS MEN EN-
DORSE THE PROJECT

One of the most important resolutions which will come before the convention of the associated boards of trade in this city next month is one originating in the Edmonton board and which forms number 34 on the program. The entire resolution reads:

"Whereas there is in Western Canada many millions of acres of land of great economic value still unsettled and unproductive, owing principally to the lack of transportation facilities; and whereas, owing to the great distance of those western communities already settled from the seaboard and from the great industrial and commercial centres, the success and prosperity of such western communities is dependent in an extraordinary degree on the sufficiency of transportation facilities for the expeditious handling of traffic at the lowest possible cost.

"And whereas the extraordinary rapidity with which the new portions of Western Canada are being settled, promises to cause such an increase in the volume of traffic as is likely to overtax the capacity of existing means of transportation, even with the addition of new systems now under construction.

"And whereas experience has proved that the most effective control of freight rates is healthy and active competition for traffic.

"And whereas it does not appear that the producers and consumers of Western Canada are yet enjoying the lowest rates of freight compatible with successful operations of existing railways.

"Therefore be it resolved that in the opinion of this convention, the Dominion Government should be strongly urged to afford all reasonable encouragement to any proposition looking to the increase of transportation facilities in Western Canada, and that no legislative obstacles should be placed in the way of any railway wishing to build lines in any direction; and that copies of this resolution be sent to the Premier of Canada, to the Honorable Minister of Railways, and to the representatives of all parliamentary constituencies in Saskatchewan and Alberta."

The resolution takes the ground that the west has not sufficient railway facilities nor sufficiently low traffic rates, and that therefore no legislative obstacles should be thrown in the way of railway enterprise in the western country. The reference is plainly to Mr. Hill's proposed system and should sufficiently reveal to the eastern opponents of the project the light in which it is regarded by the business men of the west.

THE BOARD OF TRADE CONVEN-
TION

The annual convention of the associated boards of trade in Western Canada has justly come to be regarded as an event of more than usual importance to the western country. The purpose of the organization is to secure the co-operation of western business men in an organization which shall stand in the same relation to the entire west as the local board of trade does to its community. To secure this each board in Western Canada is invited to join the association and elect delegates to attend the annual convention. Each local board has the privilege of submitting through its delegates resolutions which it may desire discussed and endorsed by the Association.

The resolutions from the local boards naturally arise largely from local conditions and discussion in the convention brings out their bearing on the country generally. While the disadvantages of one community are likely to be more or less general if not infrequently occurs that the remedy suggested by one local board requires modification and extension in order to meet the conditions in other communities. And it may sometimes occur that the remedy proposed to correct an evil in one locality might itself work harm in communities differently situated.

The presence of representatives from all parts of the country brings the resolutions of the local boards under the supervision of the general business interests of the country where they may be altered to suit the broader consideration of the general welfare. When such resolutions have been examined, re-cast and endorsed by the convention they form much more reliable guides to the governing bodies to whom they may be addressed or stronger protests to the corporations toward which they are sometimes directed.

The annual convention of the association will be held in Edmonton next month, and the resolutions, of which

notice has already been given by the boards, are reproduced elsewhere in today's issue. The program is a comprehensive one and should enable the delegates to so occupy their time as to add to the good work already done by the organization and to enhance the public regard which it already enjoys.

TO PROVIDE WATER FOR THE
MINERS

Vancouver, B. C., May 24. — There will be an abundance of rain in the Yukon this season if the predictions of Messrs. C. M. and Paul Hatfield, of Los Angeles made the other afternoon, are carried out. The two young men will go north on the Princess Beatrice on the 26th to fulfil a contract with the Yukon government to provide sufficient rain to keep the creeks in good supply during the season. For this they will receive the sum of \$10,000 if they are successful, and the bare cost of the trip and maintenance if the results are not apparent.

C. M. Hatfield does not believe that there is a shadow of doubt of his success. He claims that his business has passed from the realm of theory into practical certainty. He has conducted 34 experiments in Northern and Southern California during the past four years and has not met failure in a single instance. In one country where the normal precipitation for years had only been six inches, he made a contract and more than met the stipulations, providing 11.54 inches before his period was up. He will go back to this district now for a number of years on a contract.

Mr. Hatfield states that his method is not to create rain, but to arouse conditions which will induce rain excitement to come within the desired area. This is brought about by means of chemical combinations, discharged on an elevated platform at a height of 20 to 50 feet. At Dawson he will be stationed at the Dome, a height of 4,500 feet, and the course of all the large creeks used for gold washing. If his plan is successful, it will mean, possibly millions to the district as the hydraulic and washing operations can only be carried on if there is a full supply of water.

Strathcona Plaindealer: The field work on the G.T.P. line between Cooking Lake and Strathcona has been completed and we understand that the grades have been found very satisfactory. It will be two or three days yet before the engineer's report will be ready to be sent in to the Government. There is now every prospect that Strathcona will be placed on the main line and the tall advantages accruing to such position will be realized.

—Strathcona Plaindealer: Squadron "B" C.M.R. held their first drill at the armory on Saturday evening last and got along very well. The squadron turned out forty-five strong. Major Jamieson and Capt. Pierson were in command. At the same time Sergt. Major Tighe conducted a drill of the Leduc troop which was very satisfactory. The rifles for the squadron have arrived and also their saddles and other equipment for the mounts, but the uniforms have not come yet, but are expected at any time. The outfit is now being set up on racks in the armory and will soon be all in place. Drills will hereafter be held twice a week on Tuesday and Saturday evenings.

SUICIDE AT DULUTH.

Duluth, May 31.—C. W. Young, of Summerland, B. C., committed suicide by shooting. It is thought that despondency resulting from business troubles led to the tragedy. He was fifty years of age and for ten years was cashier of the Rat Portage Lumber Company at Kenora. Last February he resigned because of bad health and engaged in the real estate business here. It is said that \$5000 would have covered his obligations.

A Review of the Lorimer System

As Edmonton is to lead the way among western cities in the installation of a Lorimer automatic telephone system the following review of the system taken from the Scientific American is of local interest:

Two Americans, the Lorimer brothers, have offered to the French government an automatic telephone system of their own invention. The apparatus will soon be put to the test of regular service at a telephone exchange and its adoption or rejection will depend on its performance. As the apparatus is very complicated, an explanation of its action and its advantages will be given without any minute description.

The apparatus now in Paris is designed for an exchange having not more than 700 subscribers, half of whom are connected with each section of the apparatus. Communication between two subscribers connected with one section is established entirely within that section, while communication between subscribers of different sections falls into action four pieces of apparatus, of the sender's section and one of the receivers'. An electric motor, drives the horizontal arm which lies between the sections and extends throughout their length. This arm carries a series of vertical spindles, each of which gives motion, as required, to its column of superposed disks or drums. For throwing the parts of this complex apparatus in and out of gear, mechanical devices have been used, as far as possible, in preference to electrical ones.

Current for the subscribers' instruments as well as for those of the exchange is furnished by accumulators at the exchange—an improvement which does away with individual batteries and magnet-calls.

On the left of each of the two sections is an apparatus called a decimal indicator, which serves to identify the subscribers. It consists of a number of superposed circles of contact pieces. Each subscriber wire is connected with one of these contact pieces.

In the axis of the column of circles is a rotating spindle carrying contact brushes which transmit the subscriber's calls to all other parts of the apparatus. As soon as the call is made the brushes stop, the number is transmitted and the brushes resume their rotation. The sole function of the decimal indicator is to call the other parts of the apparatus into action as they are required. This ideal telephone girl instantly transmits every order and at once returns to her other patrons, all of whom she visits every three seconds in search of fresh commands. Meanwhile, what becomes of the call—that is to say the number of the subscriber called up?

By various stages it is transmitted to the auxiliary organs of the section, which is composed of exactly similar divisions, whose number depends on the volume of communication. Each of these divisions consists of five cylinders, alike in appearance but unlike in function.

The topmost cylinder, called the primary connector, represents the plug of the calling subscriber, which the operator inserts in the switchboard. It receives the number from the decimal indicator, the division starter (the single cylinder at the lower left), and the controller of the decimal indicator (the circle of contacts on the same axis with the indicator). The units of the number are received in the interior of the primary connector, the tens by the distributor placed above it.

The cylinder immediately under the primary connector, is the secondary connector which receives in like manner the number of the subscriber called up, and corresponds, with that subscriber's plug in the ordinary system.

In short the primary connector attends to the caller and the secondary connector to the person called, while the connection between the two instruments puts the two persons into communication.

The third cylinder is the signal transmitter which sends back to the caller electrical impulses, which cause a pointer on a dial attached to his instrument to indicate the number called up.

Below this is the interconnector which indicates the hundreds and thousands and therefore the section (of 100) to which the person called up belongs. The interconnector always stands at 00 if the number of subscribers is less than 100. The lowermost cylinder is a rotary commutator, which controls the relays that stop and start various parts of the mechanism at the proper moments.

The subscriber's instrument contains in addition to the usual transmitter, receiver, and call bell, an indicator with four disks, for units, tens, hundreds and thousands. By depressing the handle of each disk to the proper degree the desired number is caused to appear, as shown in the illustration. Then a quarter turn of the handle below sends the call and causes the pointer surrounded by a circle of metal buttons, which is shown just above the handle, to move from the position of communication to the next, or calling button. After from one to four seconds the pointer is seen to move over all the other buttons, making a complete revolution, and returning to the position of communication. During this movement the number called, for has been transmitted to the exchange. The pointer is controlled by the signal transmitted at the exchange, as has already been stated.

Having thus sent his call the subscriber takes down his receiver, applies it to his ear and presses a button which rings the bell of the person called up. The sound of the bell is heard in the caller's receiver, and indicates that the communication is established. Failure to hear the bell indicates that the line is not free. In this case the receiver is hung up and the call is repeated a few minutes later. The whole operation is very simple.

Subscribers' instruments of this character suffice for all cases in which the exchange serves fewer than 10,000 subscribers. If there are more than 10,000 lines, the subscriber's instrument has an additional lever, which indicates the particular exchange (of 10,000 subscribers) to which the person called belongs, and puts at the caller's disposal an auxiliary wire connecting the two exchanges.

This call is thus switched temporarily to the other exchange at which all the operations described above are performed, his own exchange serving merely to put his wire in connection with the other exchanges.

Thus a subscriber of exchange K, wishing to talk to a subscriber of exchange W, turns his supplementary lever to the letter W, and is immediately connected with one of the wires running from K to W. (Of course all such wires are in use). Then he has indicated his number, which in his case, is the number of the inter-exchange wire which has been assigned to him—the

remaining steps in the transmission are made by four cylinders of exchange W, precisely as if the call had come from a subscriber of that exchange.

It may happen that the apparatus of the exchange is overwhelmed with demands. In that case the calls are stored up and are transmitted, without the necessity of repeating them, as the divisions become free. This delay will be avoided if the apparatus comprises a sufficient number of divisions. It has already been stated that a section can be extended by adding one or more divisions, as links are added to a chain, but it is preferable to install, at the outset, a sufficient number of vertical divisions to meet all probable demands.

If a division becomes out of order it can be cut out and repaired without interrupting the service of the section, for the decimal indicator selects available divisions and passes over the others. In ordinary service, too, the intelligent and silent foreman judiciously distributes the work among his subordinates, giving a sufficient share to each.

With the system now in use a break occurring in a subscriber's wire is not detected until an attempt is made to communicate and then hours and even days may elapse before the wire is repaired. With the Lorimer system, on the contrary, any defect on the circuit is instantly indicated by the ringing of a bell, and the flashing of two lamps corresponding to the section and division to which the damaged wire is attached. Linemen are at once sent out and the break may be repaired before the subscriber has had occasion to know of its existence.

CONSTABLE SHOT HIMSELF.

Calgary, May 30.—Yesterday morning the men around the R.N.W.M.P. barracks were startled by hearing a pistol shot from the direction of the barracks hospital. It was discovered that Constable Waldo, who has been on the sick list for a considerable time, had shot himself in the breast.

The bullet missed his heart by a fraction of an inch and passed out of his back. It was thought at first that it had pierced a lung, but on examination it was discovered that it had struck a rib, passed around the left side and come out of his back, without touching any vital organ.

At a late hour he was reported from the Holy Cross hospital to be very much better and to have every chance of recovery.

Waldo has been in Calgary for about a year. He was about to be sent to Regina to be invalided from the force. He had an excellent record for general intelligence and good behaviour, and was highly thought of by the officers and his comrades. His mind was no doubt temporarily unhinged by his long illness and the prospect of leaving the force.

QUESTIONS TO BE DISCUSSED AT BOARD OF TRADE CONVENTION

Matters Which Will be Submitted for Consideration of Delegates to the Convention Next Month

The annual convention of the Associated Boards of Trade of Western Canada will be held in Edmonton on Wednesday and Thursday, June 14th and 15th. The various boards have sent along notices of the resolutions which will be introduced by their respective delegates and these have been published by the local board in pamphlet form. Following is the list, together with the name of the Board suggesting each:

Regina.—Resolved, that the Associated Boards of Trade of Western Canada continue as at present constituted for the year 1907.

Regina.—Resolved, that the Dominion Government be asked to nominate, in each of the new provinces, a point of redemption for the notes of Canadian chartered banks and to appoint deputies of the Receiver-General to reside at such points, so that Saskatchewan and Alberta may be placed on the same footing as the other provinces of the Dominion in this respect.

Strathcona.—That the Dominion Government be requested to pass legislation compelling all imports of goods to be marked according to Canadian standards.

Wetaskiwin.—That representations be made to the Land Department of the C.P.R. that in view of the opening up of a large tract of land belonging to that company lying west of the Calgary and Edmonton Railway, it would be a great convenience to the settlers now in the country as well as to others to come, that the Land Department of the company open an office in the Province of Alberta, to be located at any point north of Red Deer.

Edmonton.—That the Government of the Provinces of Alberta and Saskatchewan be respectfully requested to unite in the appointment of a commission for the purpose of codifying, and thus rendering uniform, as far as possible the laws pertaining to the commercial and business interests of the Province.

Calgary.—That in the opinion of this convention, it is advisable that commissions be appointed by the Governments of the Provinces of Alberta and Saskatchewan to hear evidence regarding any changes that are deemed desirable in the commercial legislation of the two Provinces, and to report their conclusions to the respective Governments, accompanying such reports by concrete amendments to the existing legislation for submission at the next session of the Legislatures.

Lethbridge.—That the Exemptions Ordinance should be amended so that exemptions from attachment by way of garnishment be limited to 25 in any one month.

Lethbridge.—That in the opinion of this convention immediate provision should be made for the establishment of Local or County Courts with resident judges in the main centres of the Province.

Lethbridge.—That in the opinion of this convention there is urgent need of some legislation providing for the arrest of ascending debtors.

Regina.—Resolved, that in order to obtain a higher degree of efficiency in our public and high schools by securing and retaining our best teachers in the profession, it is the opinion of this convention of Boards of Trade of Western Canada that higher salaries should be paid by school boards and that the salaries be graded in accordance with merit and responsibility.

Edmonton.—That the Imperial Government should be respectfully urged to make definite official declaration as to the reasons which prompt it to maintain present regulations concerning Canadian cattle. And if it should be declared that those regulations are solely for the purpose of protection against the introduction of contagious diseases with which Canadian cattle are

affected, then His Majesty's Government should be urged, as a matter of equity, to the appointment of a commission of veterinary experts, chosen from the United Kingdom, from Canada and from other self-governing colonies, who will investigate the matter, and whose conclusions will determine the maintenance or repeal of the regulations complained of, thus removing any feeling of grievance or injustice under which Canadian cattlemen are now suffering; and on the other hand it should be stated that such embargo is maintained only as a protection against Canadian competition, then the injury done to the reputation of Canadian cattle would be removed, and the right of the United Kingdom to adopt such fiscal policy as seems best to His Majesty's advisers would not be questioned.

And be it further resolved, that copies of this resolution be sent to the Honorable the Dominion Minister of Agriculture, the Secretary of La Chambre de Commerce du District de Montreal, the Secretary of the Liverpool Chamber of Commerce, and the Edmonton representative on the Sixth Congress of Chambers of Commerce of the Empire.

Strathcona.—That the Dominion Government be requested to appoint a full inspector for the Province of Alberta.

Edmonton.—That the Government be requested to provide for the appointment of Good Roads Commissioners throughout the Province, under whose direction all local improvement taxes should be expended, and

(find) That a comprehensive plan be adopted providing for the means of abatement charges upon the lands benefited, such roads as shall be permanent and shall be available in any season of the year and in all seasons, irrespective of rainfall.

Moos Jaw.—That in the opinion of this convention of the Boards of Trade of Western Canada, it is advisable that all local improvement districts or municipalities be given the option of levying and collecting a special hospital rate, not exceeding one cent per acre, the proceeds of such tax to be granted to any hospital or hospitals, as the council of the municipality or local improvement district levying such rate may direct.

Strathcona.—That the Provincial Government be memorialized to enact a City and Town Incorporation Act having the population for cities at six thousand, for towns at one thousand and to extend the powers of the village ordinance.

Wetaskiwin.—That a much stricter inspection of cars containing settlers' effects coming into Canada from the United States be enforced, to prevent the importation of dutiable goods as settlers' effects.

Edmonton.—In the opinion of this convention it is desirable that on the one hand corporations and others doing business in the west should be compelled to give protection to the public by clear disclosure of the agent's authority readily accessible to the public at large, and on the other hand that the agency should be laid down by positive legislative enactment, and to this end the law of agency should be codified.

Calgary.—That this convention urge upon the Federal and local Governments of Saskatchewan and Alberta the grave importance of establishing efficient statistical and intelligence bureaus, in conjunction with the various Departments of Agriculture, having for their objects:

(1) The gathering and compilation of statistics of agricultural production.

(2) To investigate and report upon values of agricultural products in foreign markets with special reference to the extension of our trade in such products.

BEWARE OF "WOODEN NUTMEGS."

THIS is an age of imitations! The symbol of the period should be the "Wooden Nutmeg."

Every sincerely good and reliable article of commerce has today a score of deceptive substitutes poisoning upon its market. And, if the substitutes were as good as the originals they would not need to imitate the outward appearance of these originals, but could create a market of their own, on merit.

The Maker of a sound, and reliable article makes it sound and reliable so as to deserve, and hold, a future market.

The Maker of a substitute for that article makes it for present profit only—to trade upon the goodness of the original.

He has nothing at stake for the future, and his policy is to give you the shell without the kernel—the appearance without the value.

Some Shoe Retailers prefer selling "long-profit" shoes to selling "The Slater Shoe" which is price-controlled by the Makers.

But, —don't forget that the Slater Shoe is priced by the Makers to prevent your being over-charged when you buy them.

Look for the Slater frame and the Makers' price, \$4.00 or \$5.00 on the lining.

Try A Bulletin Want Ad

(Continued from Page Six)

(3) To compare foreign with domestic values and, taking into consideration the cost of handling and transportation, to estimate the profits of the mid-land, and if such appears to be unduly high, to give publicity thereto by means of official bulletins.

(4) To investigate and report upon alleged inadequate transportation facilities and excessive transportation rates on agricultural products.

(5) To enquire into and report upon improved methods of placing agricultural products on the market which will enhance their value to the producer and enlarge our markets.

Lethbridge.—That it would be to the best interests of every class to have the Provincial Government take hold of the exportation of live stock to the end that the producer receive the full value for all export live stock raised by him.

Moosejaw.—Resolved that this convention recognizes the ever increasing importance of the trade in Canadian ducts, especially those of Western Canada, in China and Japan and the East Indies, and that in the opinion of this convention it is advisable that the Dominion Government continue to foster and encourage this trade in every possible way.

Edmonton.—That the Government of Canada be urged to take the necessary steps to make the metric or decimal system of weights and measures compulsory in Canada, securing at the same time the greatest possible co-operation both on the part of this Imperial Government and that of the Government of the United States.

Strathcona.—That the Provincial Government be petitioned to pass a statute preventing any municipality from granting bonuses to railway companies or other corporations without permission from the Legislature.

Lethbridge.—That the convention recognize the advisability of legislation restricting the bonusing of railways, corporations and industries by cities, towns and municipalities.

Edmonton.—That the legislatures of these two provinces be petitioned to enact legislation which will prevent municipalities from granting bonuses to manufacturing concerns or railway corporations, or which will at least place considerable restriction upon the practice.

Edmonton.—In the opinion of this Convention it is highly desirable that the management of municipal ownership generally should be placed in the hands of commissioners to be chosen by some suitable and conservative management such as a government commission, removed from political control and responsible rather to the government of the time than to the individual municipalities, but subject to efficient inspection at the hands of the Government.

Wapella.—That the Governments of these provinces be asked to pass such legislation as would make the municipal year commence not earlier than the first of February.

Regina.—In view of the enormous influx of settlers into the two new provinces, the large amount of railway construction now in progress or under contemplation and the rapid development of the country generally, which causes constant changes of highways, this convention of associated boards of trade respectfully urges upon the Postmaster-General the necessity of endeavoring to maintain the postal services on the basis which the progress and development of the country require.

Edmonton.—That in the opinion of this convention while all necessary economy in the administration of the public services is to be recommended, economy at the expense of efficiency is highly undesirable in a public department, the efficiency of which is of such vital importance to the comfort, convenience, progress and prosperity of the public as is that of the Post Office Department, and that the Honorable Postmaster-General be urged to at once effect such changes and improvements in the postal service of Western Canada as will adequately meet and continue to meet the reasonable public needs; and it is strongly urged that a railway mail car should be established on all western railways as soon as a regular passenger train service is established on such roads.

Ole.—That it is the opinion of this provincial board of trade that the Government having jurisdiction in the premises should immediately initiate legislation that will ensure the permanency of said crossings.

And that copies of this resolution be sent to the Premier and Minister of Railways of Canada, the Premier and Attorney-General of the Province, and the Alberta members of the Dominion and Provincial Parliaments.

Raymond.—Resolved that the members of this convention of the associated boards of trade of Western Canada be pledged to use their influence where-

ever possible to promote the use of sugar grown and manufactured in Alberta in preference to that grown in foreign countries and which is refined only in British Columbia and certain other provinces in Canada.

Strathcona.—That the convention of boards of trade reaffirm the principle of government ownership of telephones as set forth in a resolution of the second annual convention of boards of trade of the North West Territories.

Edmonton.—That the Dominion and Provincial Governments be requested to take such action as will tend to promote and preserve the growth of timber upon those areas which otherwise would not have any economic value;

That this convention heartily endorses the action of the Dominion Government in setting apart various areas as permanent forest reserves; in their ranging system carried on by the Forestry Branch of the Department of the Interior for the prevention and control of forest fires; and in the assistance given by the same Department to settlers towards tree-planting on the prairies;

That the Dominion Government be requested to embody in the home-stead regulations provisions for retaining on wooded lands and for tree growing on prairie lands from 20 to 30 acres of wood per quarter section.

Edmonton.—That the Government be requested to provide that no town site should hereafter be laid out in the province until the location has been approved by the Lieutenant-Governor in Council, a proper plan has been submitted and approved, providing for drainage, water supply if any available, and parks and public squares, and that the plan should comply with proper standards to be laid down in that behalf and that any addition to any town site now laid out, subject also to the foregoing, be made to harmonize as to streets and general plan, with the original plan.

Edmonton.—That in the opinion of this convention the Dominion Government should be strongly urged to afford all reasonable encouragement to any proposition looking to the increase of transportation facilities in Western Canada, and that no legislative obstacle should be placed in the way of any railway wishing to build lines in any direction; and that copies of this resolution be sent to the Premier of Canada, to the Honorable Minister of Railways, and to the representatives of all parliamentary constituencies in Saskatchewan and Alberta.

Lethbridge.—That in the opinion of this convention all just claims against Railway companies for lost and damaged goods be settled within sixty days, and that steps be taken to have this matter brought to the attention of the railway commission.

Lethbridge.—That in the opinion of this convention all railway companies should be compelled to issue and sign shipping bills in triplicate each of which should be as efficacious for proof of claim as any of them, and that a copy of this resolution be forwarded to the Board of Railway Commissioners.

Prince Albert.—That in the opinion of this convention the future prosperity of this great western country, and of Canada as a whole, largely depends on cheap transportation, and that as the Hudson's Bay is the natural outlet, and in our opinion is a perfectly feasible route, the Dominion Government be requested to build a road from some point on the North Saskatchewan River to Fort Churchill, as a national undertaking.

Regina.—That in the opinion of this convention the time has arrived when passenger rates should be reduced to the scale in force in other provinces of the Dominion; and that the Federal Government should take such steps as will result in removing the discrimination in passenger fares as compared with the other provinces of the Dominion, which is now so keenly felt by the people of the west.

Regina.—Whereas the railway companies now grant cheap passenger rates from points to the west, the associated boards of trade, in view of the rapid development of this portion of the country, desire to urge upon these companies the granting of similar excursion rates from western points to the east during the summer months.

TWO DROWNED AT MONTREAL
Montreal, June 1.—There were two drowning fatalities here yesterday. A boy named Menard, while fishing, fell off a wharf and an unknown man 40 years of age, was drowned in the canal beside the Olivine Mills in view of a hundred people.

BODY FOUND IN RED RIVER
Winnipeg, June 1.—Washed in among logs on the Red River, at Point Douglas, the body of a man was found this morning by Frank Daniels, employed by the lumber company. The corpse is still unidentified.

LOCAL.

In order to reach the News or Editorial rooms of the Bulletin, ring up Phone No. 450

—The city council meets this evening.

—Dr. Gillespie, of Lindsay, Ont., will open offices in the city in a few days.

—About fifty young people enjoyed themselves at a dance last evening in the old Oddfellows' Hall, Norwood.

—Next Sunday being Whit Sunday, Holy Communion will be celebrated in All Saints at 8 and 11 a.m.

—Theodore Knappen, secretary of the Western Canadian Immigration Action. Mr. Knappen, it is understood, has accepted a position in the advertising department of the C. P. R. and will take up his duties in that connection almost immediately.

—The canvass for subscriptions for the new Y. M. C. A. building fund from the workmen of the city, is meeting with great success, as is also the canvass of the business men. A number of pledges have been given for \$500 and also some for two hundred and for three hundred dollars.

—At the sittings of supreme court, at Fort Saskatchewan this week, Judge Harvey sentenced Beupre, charged with theft, to one year imprisonment at Fort Saskatchewan, and Stazuk, convicted also of theft, was sent down for three months' hard labor. The other criminal cases were dismissed.

—Mr. Wm. Barnhouse, of the city electric department, has a hen that has caught the spirit of expansion now abroad in the West. In these growing times this thrifty fowl is not content with eggs of the ordinary size. With real estate steadily increasing in price she realizes that to make the hen house worth the ground it occupies she must be up and doing. Two of her latest productions are fine specimens of hen fruit. One measures 3 1/4 inches by 6 1/4 inches in circumference, and weighs four ounces, while the other is a trifle larger, measuring 3 1/2 by 4 1/2 inches, and weighing 4 1/4 ounces. "Bully" is not selling these eggs at a York shilling a dozen.

—Mr. J. Banford, of the Mason & Risch Piano Co. reports business splendid and has just closed the year with 32 sales. This is a wonderful output of high grade pianos, whose renowned excellence is fully endorsed by those critical musicians into whose splendid homes they have gone. Mr. Banford may be justly proud of the rapid growth and substantial support his business has received in this district. After thirty years' experience in the piano and organ industry he is well qualified to assist all those wishing to purchase by honest, fair criticism, and every detail is made to suit a customer. Delivery is always prompt. The Mason & Risch piano holds a front rank position among the highest grade pianos and distinctly by its merits. Special art cases and tone qualities unexcelled, with an action of the finest construction possible, are features that have made the Mason & Risch piano the leader of the Canadian trade. Edmonton warerooms, Second street west, south of Jasper avenue, where all orders for piano tuning may be left.

SOCIAL AND PERSONAL

H. E. Mitchell, of Pembina, is registered at the Queen's.

H. Finlay, of Calgary, is registered at the Pendennis.

E. Dagg, of Calgary, is registered at the Alberta.

J. C. Baker, of Ottawa, is a guest at the Alberta.

J. P. Cowan, of Welskwin, is a guest at the Queen's.

Mrs. C. W. Cross left this week for Vancouver.

Mrs. Clyde Green, of Toronto, will arrive in the city this evening to spend the summer with her sister-in-law, Mrs. Frank Green, Howard street.

A. T. Cushing, president of the Board of Trade, returned on Wednesday evening from a business trip to the coast province.

MOVING PICTURES

San Francisco during the earthquake and disaster will be reproduced with a picture machine at the Thistle rink commencing Monday, June 4th. Performances every evening at 8.30 p.m. for one week. These pictures, which were taken during the progress of the great fire, are the first reproduction of the events, which took place following the earthquake shock, and show the scenes and incidents which occurred during the reign of terror which followed the burning and dynamiting of the dwelling houses and business blocks. The scenes in Golden Gate Park, in which tens of thousands took refuge, the arrival and distribution of relief supplies, and all the interesting and horrifying events, which took place during the week of the calamity. There will be a sufficient and graphic description from first to last.

Performance commences every evening at 8.30 p.m.

SUPREME COURT DOCKET

The June session of the supreme court opens in Edmonton on Thursday next, June 5, at ten o'clock, Judge Harvey presiding. There is a large docket of debt cases, but the criminal docket is small. Following are the dockets:
